

Smart Home. Smart Savings.

Our homes are smarter than ever, thanks to continually improving technology that allows us to be home even when not physically there. There are various devices and fixtures available to solve particular issues, such as a smart thermostat to monitor and adjust your home's temperature remotely or an automatic water shutoff valve that shuts down the water supply to your home if a leak is detected. Some of these devices are now capable of multiple functions.

To recognize the additional protection that these devices provide to a home, Penn National Insurance now offers discounts on the following types of devices:

	Video Doorbell		Wi-Fi Thermostat
	Water Sensors		Whole House Generator
	Security Cameras		Wi-Fi Smoke Detectors
	Multi-Function Home Sensors		Automatic Water Shut Off

Don't forget about our traditional discounts for qualified home owners.

- Homeowners Loss Free
- Nonsmoking Household
- Retired Daytime Occupancy
- Electrical Renovations
- Plumbing Renovation
- Heating Renovation
- Fire Protective Device
- Burglar Protective Device
- Roof Replacement

Save More

Place your auto insurance with us and you'll receive an additional 26% discount on your premium.

Now, that's a smart homeowner.
